(54) Title: **DEVICE FOR WASHING THE EXTERNAL AUDITORY MEATUS**

(57) Abstract: A device is described for washing the external auditory meatus comprising at least one inlet channel (6) for the washing liquid and one discharge channel (8) which connects the end portion of the inlet channel with the outside environment, the discharge channel being designed to discharge the washing liquid outside if a further channel (9), designed to discharge the liquid and the products of washing (wax, epithelial scales, etc.) outside, is at least partially obstructed by the products of washing. The further channel may consist of the external auditory meatus, of an aural speculum in which the washing device (10) is inserted, or of an outlet channel made in the body of the washing device (10).

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *Z* document member of the same patent family
